

ABSTRACT OF THE DISCLOSURE

A color proof forming apparatus, which having: the structure in which a plurality of light sources with the different wavelengths are provided, and the light sensitive material is exposed to the light beams emitted from the plurality of light sources; an image processor to receive a plurality of colors of image data including the black color, and to form the data for the exposure; a controller to control the plurality of light sources according to the data for the exposure formed by the image processor, wherein the image processor forms the data for the exposure which is different in image data in which the black color and other colors are overlapped with each other, and image data of only the black color.
